IMPERIAL BUREAU OF PASTURES AND FORAGE CROPS,

ABERYSTWYTH, GREAT BRITAIN

Mimeographed Publication No. 5/1939

BIBLIOGRAPHY ON WHITE CLOVER (TRIFOLIUM REPENS)

Issued April, 1939.

Price 2s. 6d.

Series of Bibliographies to be published by the Imperial Bureau of Pastures and Forage Crops

---

This Bureau has been accumulating references to literature on herbage and forage crops for the past ten years, and maintains a comprehensive index for use by any visiting scientists wishing to consult this literature. As, however, the great majority of herbage specialists are unable to make direct use of these facilities, the Bureau now proposes to prepare, as far as facilities permit, a series of mimeographed bibliographies for distribution to any persons and institutes particularly interested. Owing to financial restrictions, it is not possible to grant free distribution of these publications to any but a few central libraries and official correspondents. The continuance of this series depends on whether its cost is covered by returns from sales.

This second bibliography contains all the references on white clover indexed in the Bureau. It is not claimed to be exhaustive, as no special research of the literature has been made. The Deputy Director would welcome information regarding additional references not included and reprints when available.

Bibliography on White Clover

Contents

	Page
General	2 - 8
Pastures and grassland	9 - 11
Cyanophoric tests	11 - 12
Breeding and Genetics	13 - 14
Varietal and straw trials	14 - 18
Vitamin content	18
Seeds and seed production	19 - 21
Seed certification	22 - 23
Sowing	23 - 24
Manuring	24 - 25
Diseases and pests	25
Index of authors	26 - 29
List of translations available	30
